Creating a VCU Guest Wireless Account

Connect your device to the **VCU Guest Wireless** wireless network on VCU campus. Your device browser will open automatically and direct you to this page:

- **Computer Login**
- **Mobile Login**

**HINT:** If the VCU Guest Wireless page does not open automatically, please navigate to this page by typing in the following URL link: [http://example.com](http://example.com). This will ensure that you get to the VCU Guest Wireless Login page.

- Click on “Create an account” and fill out the form.
- Input a valid email address you have access to in order to retrieve the sent email authorization.
- You will be granted **10 minutes** of time to retrieve the verification email sent to your email you entered.
- After clicking the link and receiving the “Thanks” page, disconnect and reconnect to VCU Guest Wireless on your device so that you generate the VCU Guest Wireless Login page again.
- Use the new emailed credentials you just created to login into the VCU Guest Wireless.
- **NOTE:** This account requires you to re-login once a day.

**If you forget your password** you can click the “I forgot my password” URL link to go through the verification process via email again. For further assistance, please call the VCU IT Support Center at: **(804) 828-2227**
